SUMMARY

Impact and curiosity driven final-year BSc Information Technology student specializing in Computer Science and Information Systems at the North-West University. I built a strong foundation in analytical and creative problem-solving, with hands-on experience in data analytics, programming, databases and system analysis & design. Passionate about Software & Data Engineering, and i thrive in collaborative team environments that encourage continuous learning and innovation. Proficient in Java, C#, Python & JavaScript. Eager to contribute to technology driven solutions focused on solving business challenges while continuing to learn, grow professionally and technically.

EDUCATION

North West University

BSc Information Technology in Computer Science & Information Systems

Feb 2024 - Present

- **Coursework includes:**
 - Data Structures, Algorithms, System Analysis & Design, Communication, Database Design
 - Object-Oriented Programming, Statistics, Artificial Intelligence, Operating Systems
- Developing strong foundations in Problem solving, Programming, Decision-making and Information security

Tjetje Technical High School

Jan 2017 - Dec 2021

Bachelor's Pass – Science and Engineering Stream

Phoenix College of Johannesburg

Feb 2022 - Dec 2022

Upgrading Physical Science and Mathematics

EXPERIENCE

Sales Consultant

Table Charm Direct

Sep 2020 - Jan 2021

- Promoted and sold company products directly to customers, consistently meeting monthly sales targets.
- Built strong customer relationships through clear communication
- *Awarded a Certificate of Achievement* – Consultant Level, recognizing performance, product knowledge, and customer engagement.

Student Assistant - C# Programming

Feb 2026 - Jun 2026

- Assisting students in understanding programming concepts and problem-solving techniques, improving peer learning and engagement.
- Strengthened own understanding of programming in C# fundamentals through teaching and explaining technical concepts clearly.
- Marking and grading of students in-class practical assignments and providing feedback.

THEBO JUNIOR MAHLANGU

CERTIFICATIONS

- Associate Data engineer in SQL - DataCamp, July 2026
 - Deloitte Australia - Data Analytics Job Simulation (Forage), Sep 2025
 - Utilized Tableau and performed data analysis on a dataset to solve a business problem.
 - Delivered insights via a professional PowerPoint presentation and video.
 - Data Structures and Algorithms in Java – Udemy issued on Aug 2025
 - Introduction to cybersecurity – Cisco networking academy issued on Jun 2025
 - Google Foundations of Business Intelligence - Coursera issued on Feb 2026
-

SKILLS

- Data Analytics & Visualization, Excel
 - Communication & Collaboration
 - Languages: Python, Java, C#, SQL
 - Databases: MongoDB, MySQL, MS Access
 - Web Development: JavaScript, HTML, Tailwind CSS, ASP.NET, .NET Framework
 - Concepts: Data Structures & Algorithms, Hadoop, Distributed Systems
 - Tools: VS code, Visual Studio, PyCharm, GIT & GitHub
-

PROJECTS

Football Scouting System

A web-based system designed to manage and analyse player data for scouting purposes

- *Designed and developed a role-based system for Admins, Scouts, and Players*
- *Structured and managed data using MongoDB to handle user interaction and player information*
- *Applied system analysis and design principles to define requirements as module coursework required*
- *Collaborated within a team to develop and refine system architecture and features*
- *Built our backend with Python and Exposed our APIs to the frontend which was built using JavaScript*

Database System

- *Collaborated in a team to design and implement an Oracle-based relational database system for a fictitious company, applying database design principles, ER modelling, normalization, and SQL implementation as part of CMPG311 Databases Module.*
- *Designed a robust conceptual schema by creating comprehensive Entity-Relationship Diagrams (ERDs) to map complex business rules and data relationships.*
- *Translated logical designs into physical implementation by writing optimized DDL scripts for tables constraints (Primary/Foreign Keys), and indexing strategies.*
